

## NHS Summary Care Record with Additional information (SCRAI)

There may be **unplanned or emergency** situations where you may need to be treated by health and care professionals that do not know your medical history. Essential details about your healthcare can be difficult to remember, particularly when you are unwell or have complex care needs. Having an SCR means that when you need healthcare you can be helped to recall vital information. SCRs can help the staff involved in your care make better and safer decisions about how best to treat you.

**You can choose to have additional information included in your SCR, which can enhance the care you receive.** This information includes:

- Your illnesses and health problems.
- Operations and vaccinations you have had in the past.
- How you would like to be treated - such as where you would prefer to receive care.
- What support you might need.
- Who should be contacted for more information about you.

### What to do next

If you would like this additional information adding to your SCR (or the SCR of someone you are a carer for), then please complete this form.

### Children/Under 16's

Currently there is no national system for reviewing patients SCR/SCRAI consent options when they reach the age at which they are competent to make decisions about their own care therefore any sharing decisions made by a parent or guardian will continue to be valid unless the patient actively amends their consent preferences when they are older.

If you are the parent or guardian of a child under 16 and feel they are old enough to understand then you should make this information available to them and support them to come to a decision as to whether they wish to supplement their SCR with additional information. If your child cannot understand but you believe they may benefit from additional information within their SCR as a parent or guardian you can consent to this on their behalf however we advise that once they become old enough to understand this decision that you advise them of your choice and it's implications. Consent preferences can be changed at any time simply by contacting the surgery.

### Vulnerable patients and carers

Certain vulnerable patient groups such as those with dementia or with detailed and complex health problems can particularly benefit from additional information in their SCR. If you are a carer for another person and believe that they may benefit from additional information in their SCR and they lack the capacity to consent themselves then you can consent on their behalf.

Name of Patient: .....

Date of Birth: ..... Patient's Postcode: .....

Surgery Name: ..... Surgery Location (Town): .....

NHS Number (if known): .....

Signature: ..... Date: .....

If you are filling out this form on behalf of another person, please ensure that you fill out their details above; **you** sign the form above and provide your details below:

Name: .....

Capacity:
