

Let's Get Digital

A free service in Brighton & Hove getting older people online with a tablet loan scheme

Our free 'Lets Get Digital' service supports everyone 50+ wanting more confidence getting online and using digital technology.

This is a service that we can tailor to your needs, so if you want to shop online, speak to family across the globe or send an email – get in touch! We know using digital technology can be challenging, but we hope we can make it that little bit easier and get you digitally connected. We'll focus on security and safety as well as other essential tools to keep you informed, independent, connected and healthy! We can even loan you a tablet if you need to get set up.

You will be able to

- Borrow a tablet device using our loan scheme
- Join group and personalised 1:1 sessions to improve your digital skills and confidence
- Organise a personal support session

How does it work?

Anyone aged 50+ in the Brighton & Hove area is welcome to access our service by calling or emailing us. We'll then organise an initial chat with you to understand your individual needs, your experience of using digital technology and what you would like to achieve with us.

We can then invite you to a group in your local area or arrange a 1:1 session with our Digital Team.
